

CYBERPUNK RED GM CONSOLE

FOUR CORE SCREENS · UI DIRECTION REVIEW

A desktop tool for running Night City: load a campaign, read the city, stage the fight, build the people in it.

SAVES ARE FILES

Path, format, size and integrity are on screen. Restore points are listed, not hidden in a menu.

ONE OBVIOUS ACTION

The active save takes the hero slot with a single Continue. Everything else is a scannable list.

STATE AT A GLANCE

Party HP, humanity and last session's log so the GM re-enters mid-thought.

LAST SESSION LOG

SESS 14

Party breached the Kabuki parkade and lost the courier in the stairwell.

SESS 16

Doc Tallow took 22 from an auto fire burst - still at Seriously Wounded.

SESS 13

Mira traced the Arasoma leak to a dead drop under the Pacifica pier.

SESS 13

Maelstrom marked the party. Watson heat raised to 4.

SESS 12

Five "Ninetals" advanced 3,000db against the courier job.

NIGHT CITY MAP

HOVER TO INSPECT

Every district reports who holds it, danger level, NCPD response time and population — live in the mockup.

HOOKS ON THE MAP

Diamond markers flag districts with open jobs; the panel lists them with their clocks.

THE CITY RUNS

Date, time of day, weather and a scanner feed. Advance the clock and the city moves with it.

The final draft looks like a map of night city (the GM can upload any map but the default one is night city) and these information open up when hovered over the zones.

ISOMETRIC LOCATION

BUILD, THEN FIGHT

Drag tiles, props and units from the palette; shift stamps a row, alt raises elevation.

MATH THAT SHOWS ITS WORK

REF + skill + 1d10 versus range DV, cover penalty, SP ablation — written out so the GM can override it. Also, it should be able to calculate when "cover" is in its line of fire and ask the GM to allow or ignore cover.

TWO AUDIENCES

A fog-of-war preview of the player view sits in the rail, with an explicit push.

CHARACTER FORGE

ONE EDITOR, THREE USES

PCs, named NPCs and mook templates differ by a tag, not by screen. Roll a random mook in one click.

FULL STAT SHEET

Ten STATS, skills with totals, gear and cyberware costed in Humanity, SP tracked per hit location.

COVER IS A CHARACTER

Size, material, SP and HP with a live isometric preview — saved straight into the combat palette.

RULES EFFECT

Blocks LOS above 1.2m for prone targets only. Attackers take -2 to hit: the barrier absorbs damage at SP 15 and ablates 1 per hit taken.

SAVE TO PALETTE

PLACE ON MAP

WHERE TO PUSH

1B

MAP VARIANTS

Hex-based zones, or a photographic satellite plate with the overlay on top.

1C

GLITCH PASS

Harder netrunner treatment on the combat HUD — or the reverse, stripped further back.

1D

PLAYER VIEW

The same sheet as the players see it, with GM-only fields removed.

■ STILL NEEDED: KEY ART, PORTRAITS, TILE ART — EVERY HATCHED SLOT IN THE MOCKUPS
